EXPERIENCE

Citibank, Irving, TX — *Data Services Engineer*

April 2018 - PRESENT

- Led UI development for Customer Graph, an insights initiative aggregating batch and real-time data, which involved refactorization from deprecated AngularJS to Angular 5
- Received Citi Digital's first "Go for Gold" award for Customer Graph's excellence in build optimization, process automation and CI/CD capabilities
- Interfaced with microservice teams to integrate SSO, APIM and GraphQL APIs into the CG application

Citibank, Irving, TX — *Front-End Developer*

July 2017 - April 2018

- Created, tested and modified a library of common components, developed with Angular 5, to be consumed by Category 1 CBOL teams
- Interfaced with creative directors, business partners and other digital teams distributed globally to ensure compliance with Citi's DDL Style Guide and ADA requirements
- Led the development and deployment of a full-stack microsite for Citi Fintech's Canvas initiative

Synthio, Atlanta, GA — *Data Analyst*

June 2016 - January 2017

- Operated in an Agile environment to improve the company's DBaaS app and maintain a database of over 3 million records
- Provided daily data analysis reports using Python scripting, SQL and Excel for Sales and Marketing purposes
